

Transflo Mobile+ Messages

Introduction: This document explains how Qualcomm free form messages and preplans can be received.

Transflo Mobile+ Load and Messaging Features:

1. The “Loads” option allows carriers the ability to send preplans to a driver. You can then accept a load, decline a load and confirm pickup and delivery from their smart phone.
2. Preplan information is displayed in the Available menu item.
 - a. The driver can select a preplan to view the information in detail.
 - b. The Accept or Decline keys are visible at the bottom of the load information.
3. Receive Qualcomm Messages
 - a. If you have an unread message the message icon turns blue and displays the number of unread messages.
